Oluwafemi Soaga

Frontend Engineer

I'm a Software Engineer who is passionate about software development, innovation, and startups. Throughout my career, I have collaborated with diverse teams on multiple projects catering to everyday users (HrDesk.Africa, BillerHq.com, sarepay). I have expertise in developing user-centric web applications primarily utilizing Javascript, typescript and various external APIs. I excel in frontend development, proficient in crafting responsive and intuitive interfaces using frameworks like React and Vue.js. I thrive on leveraging my programming skills to address real-life challenges and continuously expand my knowledge. My experience spearheading web application development for early-stage startups has honed my ability to rapidly implement features, meticulously monitor system usage, and iterate changes to optimize customer experience. A hardworking, resourceful, and solution-driven individual with a rich ICT background and excellent work ethics. I possess good interpersonal skills, mental strength, and emotional intelligence to manage pressure and deliver results within deadlines. A goal-oriented individual committed to adding value to any organization.
